SDA Vision / Research report

animated-video.mov

Assessment summary

Field	Recorded detail
Finding	Leaning synthetic
Recorded verdict	synthetic likely
Confidence	medium
Indicative rating	84/100
Rating basis	rounded mean of available frame scores; not a calibrated probability
Explanation	4 of 4 frames read as synthetic or edited.
Coverage	video - 4 frame(s) analysed
Review context	Research assessment. Review alongside source information and context. When credentials are missing, origin remains unresolved by this check. Use these findings to inform a documented human review.

Provider overview

Provider	Type / status	Assessment	Rating
Claude Vision	vision / ok	synthetic likely	90/100
OpenAI Vision	vision / ok	synthetic likely	88/100
Gemini Vision	vision / ok	synthetic likely	68/100
C2PA Content Credentials	provenance / ok	inconclusive	n/a
Local forensic cues	forensic / ok	partially synthetic	47/100

Provider evidence / 1

Field	Recorded detail
Provider	Claude Vision
Model	claude-opus-5-5
Status	ok
Assessment	synthetic likely
Confidence	medium
Role in assessment	Supporting
Provider summary	Worst of 4 frames (00:09): synthetic likelihood 90/100; tells: glowing swirling portal inside brick archway rendered seamlessly into scene lighting, smooth, waxy skin texture with painterly softness on all three faces, uniformly cinematic teal-orange grade and volumetric haze typical of generative video models, fruit in crates and baskets rendered as repetitive, near-identical blobs with little individual detail
Evidence 1	Frame 00:03: 85/100
Evidence 2	Frame 00:06: 88/100
Evidence 3	Frame 00:09: 90/100
Evidence 4	Frame 00:12: 88/100
Evidence 5	Glowing swirling portal inside brick archway rendered seamlessly into scene lighting
Evidence 6	Smooth, waxy skin texture with painterly softness on all three faces
Evidence 7	Uniformly cinematic teal-orange grade and volumetric haze typical of generative video models
Evidence 8	Fruit in crates and baskets rendered as repetitive, near-identical blobs with little individual detail
Evidence 9	Illegible, smeared signage on building in background portal view
Evidence 10	Left woman's hand-held apple and basket handle show soft, ambiguous edges
Evidence 11	Wet cobblestones with generic, pattern-like texture and reflections lacking consistent light sources
Evidence 12	Filename indicates frame extracted from an animated video
Evidence 13	Caveat: Assessment is based on a single compressed frame. A skilled VFX composite or CGI production could produce similar traits, so the original video, its metadata and its provenance should be checked.

Provider evidence / 2

Field	Recorded detail
Provider	OpenAI Vision
Model	gpt-6-astra
Status	ok
Assessment	synthetic likely
Confidence	medium
Role in assessment	Supporting
Provider summary	Worst of 4 frames (00:12): synthetic likelihood 88/100; tells: Translucent figures overlap the storefront with smeared, poorly resolved anatomy., Window figures do not clearly correspond to the foreground woman's pose or position., Dragon-like creature behind the left figure has soft, indistinct anatomical boundaries., Costume details and produce have unusually uniform, painterly surface smoothing.
Evidence 1	Frame 00:03: 85/100
Evidence 2	Frame 00:06: 83/100
Evidence 3	Frame 00:09: 80/100
Evidence 4	Frame 00:12: 88/100
Evidence 5	Translucent figures overlap the storefront with smeared, poorly resolved anatomy.
Evidence 6	Window figures do not clearly correspond to the foreground woman's pose or position.
Evidence 7	Dragon-like creature behind the left figure has soft, indistinct anatomical boundaries.
Evidence 8	Costume details and produce have unusually uniform, painterly surface smoothing.
Evidence 9	Caveat: Conventional CGI, compositing, and video motion blur could explain these effects; the small shop lettering is not reliably legible.

Provider evidence / 3

Field	Recorded detail
Provider	Gemini Vision
Model	gemini-3.8-flash
Status	ok
Assessment	synthetic likely
Confidence	medium
Role in assessment	Supporting
Provider summary	Worst of 4 frames (00:03): synthetic likelihood 68/100; tells: CGI or generative rendering textures on creature scales, unnatural lighting blend between creature and tunnel background, diffuse glow inconsistency around wrist gauntlet projection, smooth plastic-like skin texture on subject
Evidence 1	Frame 00:03: 68/100
Evidence 2	Frame 00:06: 68/100
Evidence 3	Frame 00:09: 38/100
Evidence 4	Frame 00:12: 35/100
Evidence 5	CGI or generative rendering textures on creature scales
Evidence 6	Unnatural lighting blend between creature and tunnel background
Evidence 7	Diffuse glow inconsistency around wrist gauntlet projection
Evidence 8	Smooth plastic-like skin texture on subject
Evidence 9	Caveat: Distinction between high-end commercial VFX/CGI and fully generative AI video frames requires full file or temporal analysis.

Content Credentials / provenance

Field	Recorded detail
Provider	C2PA Content Credentials
Model	Not recorded
Status	ok
Assessment	inconclusive
Confidence	Not recorded
Role in assessment	Additional finding
Provider summary	Embedded credentials: none found. Origin remains unresolved by this check.
Evidence 1	Coverage: credentials embedded in the submitted file. External credentials were not retrieved.
Evidence 2	Verifier: c2pa-python 0.37.12; native SDK 0.91.0; specification target 2.4; policy embedded-offline-reviewed-trust-v3.
Evidence 3	Offline embedded-manifest verification; no network trust-list, manifest or revocation refresh.
Evidence 4	No reviewed local C2PA trust snapshot installed. Provenance overrides are disabled.

Provider evidence / 5

Field	Recorded detail
Provider	Local forensic cues
Model	Not recorded
Status	ok
Assessment	partially synthetic
Confidence	low
Role in assessment	Additional finding
Provider summary	Worst of 4 frames (00:03): Heuristic synthetic likelihood 47/100 from metadata + pixel statistics.
Evidence 1	Frame 00:03: 47/100
Evidence 2	Frame 00:06: 47/100
Evidence 3	Frame 00:09: 47/100
Evidence 4	Frame 00:12: 47/100
Evidence 5	No camera EXIF (common in AI exports, screenshots, and re-saves).
Evidence 6	ELA mean 0.5, peak 14 (uniform high ELA can indicate generation/heavy edit).
Evidence 7	High-frequency noise std 2.95 (very low/very uniform noise is a synthesis cue).
Evidence 8	Spectral peakiness 39.98 (periodic frequency peaks can mark generated textures).

Per-frame results

Frame	Assessment	Rating / 100
00:03	synthetic likely	85
00:06	synthetic likely	83
00:09	synthetic likely	80
00:12	synthetic likely	88

Local soundtrack inspection

Field	Recorded detail
Record 1	Audio inspection: present; tracks: 1.
Record 2	Track 0: aac, 2 channel(s), 44100 Hz; duration 15.070499s; decode decoded; 3/3 sampled windows above -60 dBFS after mono downmix.
Record 3	Sample windows: 0.0s + 3.0s; 6.035s + 3.0s; 12.07s + 3.0s
Record 4	Original-file credentials are recorded separately. Credential coverage of this audio track: unresolved.
Record 5	Audio-level measurements cover the sampled windows. The remaining audio has not been inspected by this check.

Assessment coverage

Field	Recorded detail
Record 1	Visual verdicts for videos cover the sampled still frames. Standalone-audio content assessments cover the transcript. Soundtrack-origin detection and continuous-motion analysis are outside these assessments.
Record 2	Original-file credentials, excerpt descriptions and visual interpretation are recorded separately. Credential coverage of an individual audio track remains unresolved by this workflow.

Evidence supporting this verdict

Field	Recorded detail
Claude Vision	Worst of 4 frames (00:09): synthetic likelihood 90/100; tells: glowing swirling portal inside brick archway rendered seamlessly into scene lighting, smooth, waxy skin texture with painterly softness on all three faces, uniformly cinematic teal-orange grade and volumetric haze typical of generative video models, fruit in crates and baskets rendered as repetitive, near-identical blobs with little individual detail
OpenAI Vision	Worst of 4 frames (00:12): synthetic likelihood 88/100; tells: Translucent figures overlap the storefront with smeared, poorly resolved anatomy., Window figures do not clearly correspond to the foreground woman's pose or position., Dragon-like creature behind the left figure has soft, indistinct anatomical boundaries., Costume details and produce have unusually uniform, painterly surface smoothing.
Gemini Vision	Worst of 4 frames (00:03): synthetic likelihood 68/100; tells: CGI or generative rendering textures on creature scales, unnatural lighting blend between creature and tunnel background, diffuse glow inconsistency around wrist gauntlet projection, smooth plastic-like skin texture on subject

Additional findings

Field	Recorded detail
Local forensic cues	Supporting observation; considered alongside the model assessments.
C2PA Content Credentials	Embedded credentials: none found. Origin remains unresolved by this check.

Visible text

Field	Recorded detail
Recorded text	SLANE NW EASE (partially legible, likely garbled)

How this assessment was reached

Field	Recorded detail
1. frame_agreement	frames=4; synthetic_frames=4; authentic_frames=0; rating_spread=8
2. verdict	value=synthetic_likely; confidence=medium; reason=4 of 4 frames read as synthetic or edited.

File and analysis record

Field	Recorded detail
File	animated-video.mov
Analysis ID	cb156800-47b6-4687-a9fa-67963f5aa819
Generated	2026-09-27T21:00:50.708133+00:00
Tool	SDA Vision 0.1.0
Models	claude-opus-5-5, gemini-3.8-flash, gpt-6-astra
Method version	pdf-preparation-2026-09-26.1
Analysis lens	general
Original SHA-256	af5b2c84950d66ce32b4d7f603314a7fc70a9353d397ca71aa78d35e2327ce23
Ingestion note 1	Duration 15s; sampled 4 frame(s).
Ingestion note 2	Audio tracks inspected locally. Soundtrack uploads require a separate optional check; AI-origin detection from sound is outside this workflow.
Ingestion note 3	Visual assessment covers the sampled still frames. Soundtrack checks are recorded separately; continuous motion is outside this assessment.
Ingestion note 4	Completed provider replies recovered offline after a local thumbnail error. Response-to-frame associations were reconstructed from the distinct scene descriptions; individual API timings were not retained.
