SDA Vision / Research report

illustration-1.png

Assessment summary

Field	Recorded detail
Finding	Leaning synthetic
Recorded verdict	synthetic likely
Confidence	high
Indicative rating	78/100
Rating basis	median of available model ratings; not a calibrated probability
Explanation	3 models agree this is likely synthetic.
Coverage	image - 1 frame(s) analysed
Review context	Research assessment. Review alongside source information and context. When credentials are missing, origin remains unresolved by this check. Use these findings to inform a documented human review.

Provider overview

Provider	Type / status	Assessment	Rating
Claude Vision	vision / ok	synthetic likely	82/100
OpenAI Vision	vision / ok	synthetic likely	78/100
Gemini Vision	vision / ok	synthetic likely	72/100
C2PA Content Credentials	provenance / ok	inconclusive	n/a
Local forensic cues	forensic / ok	partially synthetic	41/100

Provider evidence / 1

Field	Recorded detail
Provider	Claude Vision
Model	claude-opus-5-5
Status	ok
Assessment	synthetic likely
Confidence	medium
Role in assessment	Supporting
Provider summary	synthetic likelihood 82/100; tells: not a camera photo: digital illustration in a uniform, polished comic/ink-and-colour style typical of current image generators, hyper-consistent line weight and cel shading across all figures with no stroke variation or construction marks, noisy, fragmented texture in the grey curly hair, resembling generator detail artifacts rather than deliberate strokes, tablet screen shows an indistinct garden/playground scene with smeared, non-specific detail
Evidence 1	Not a camera photo: digital illustration in a uniform, polished comic/ink-and-colour style typical of current image generators
Evidence 2	Hyper-consistent line weight and cel shading across all figures with no stroke variation or construction marks
Evidence 3	Noisy, fragmented texture in the grey curly hair, resembling generator detail artifacts rather than deliberate strokes
Evidence 4	Tablet screen shows an indistinct garden/playground scene with smeared, non-specific detail
Evidence 5	Wheelchair spokes and frame are mostly plausible but slightly irregular in spacing and junctions
Evidence 6	Hands are well formed overall, which lowers but does not remove suspicion
Evidence 7	Stock-style composition, clean white background, no signature, no watermark
Evidence 8	Caveat: Skilled human digital illustrators can produce this polished style, and the hands and anatomy are largely coherent. Style cues alone cannot confirm AI origin, so check file metadata/C2PA, the artist's source, or reverse image search.

Provider evidence / 2

Field	Recorded detail
Provider	OpenAI Vision
Model	gpt-6-astra
Status	ok
Assessment	synthetic likely
Confidence	medium
Role in assessment	Supporting
Provider summary	synthetic likelihood 78/100; tells: Older woman's gray hair contains tangled, ribbon-like shapes inconsistent with the other hair rendering., Wheelchair spokes and lower frame tubes form irregular junctions and ambiguous connections., Gesturing hands have uneven finger separation and merged-looking contours., Tablet garden has noticeably softer, less defined detail than the surrounding outlined illustration.
Evidence 1	Older woman's gray hair contains tangled, ribbon-like shapes inconsistent with the other hair rendering.
Evidence 2	Wheelchair spokes and lower frame tubes form irregular junctions and ambiguous connections.
Evidence 3	Gesturing hands have uneven finger separation and merged-looking contours.
Evidence 4	Tablet garden has noticeably softer, less defined detail than the surrounding outlined illustration.
Evidence 5	Caveat: This is a digital illustration, not a photograph; stylized drawing errors alone cannot establish AI origin without provenance.

Provider evidence / 3

Field	Recorded detail
Provider	Gemini Vision
Model	gemini-3.8-flash
Status	ok
Assessment	synthetic likely
Confidence	medium
Role in assessment	Supporting
Provider summary	synthetic likelihood 72/100; tells: stylized digital line art with subtle AI generative markers, irregular finger proportions and geometry, overly smooth shading gradients typical of generative models, inconsistent perspective on wheelchair spokes
Evidence 1	Stylized digital line art with subtle AI generative markers
Evidence 2	Irregular finger proportions and geometry
Evidence 3	Overly smooth shading gradients typical of generative models
Evidence 4	Inconsistent perspective on wheelchair spokes
Evidence 5	Caveat: High-quality human digital vector/raster illustrations often closely resemble generative 2D art styles.

Content Credentials / provenance

Field	Recorded detail
Provider	C2PA Content Credentials
Model	Not recorded
Status	ok
Assessment	inconclusive
Confidence	Not recorded
Role in assessment	Additional finding
Provider summary	File integrity: validated. Signer trust: unresolved under the current local policy. The recorded declarations remain available for review and are not used as a decisive provenance finding. Manifest declares AI-generated content.
Evidence 1	Credentials: embedded manifest found.
Evidence 2	Integrity: valid (SDK validation).
Evidence 3	Signer trust: untrusted under the configured verifier.
Evidence 4	Active manifest: Manifest declares AI-generated content.
Evidence 5	Claim generator (declared tool): OpenAI Media Service API
Evidence 6	Declared signer: OpenAI OpCo, LLC
Evidence 7	Declared source type: http://cv.iptc.org/newscodes/digitalsourcetype/trainedalgorithmicmedia
Evidence 8	Active record - declared tool: OpenAI Media Service API; actions: c2pa.created, c2pa.converted, c2pa.watermarked.unbound.
Evidence 9	Active record - all actions recorded (signer's declaration): no.
Evidence 10	Validation outcome: signingCredential.untrusted
Evidence 11	Validation outcome: timeStamp.validated
Evidence 12	Validation outcome: claimSignature.insideValidity
Evidence 13	Validation outcome: claimSignature.validated
Evidence 14	Validation outcome: assertion.hashedURI.match
Evidence 15	Validation outcome: assertion.dataHash.match
Evidence 16	Validation outcome: timeStamp.untrusted

Field	Recorded detail
Evidence 17	Verifier: c2pa-python 0.37.12; native SDK 0.91.0; specification target 2.4; policy embedded-offline-reviewed-trust-v3.
Evidence 18	Offline embedded-manifest verification; no network trust-list, manifest or revocation refresh.
Evidence 19	No reviewed local C2PA trust snapshot installed. Provenance overrides are disabled.

Provider evidence / 5

Field	Recorded detail
Provider	Local forensic cues
Model	Not recorded
Status	ok
Assessment	partially synthetic
Confidence	low
Role in assessment	Additional finding
Provider summary	Heuristic synthetic likelihood 41/100 from metadata + pixel statistics.
Evidence 1	No camera EXIF (common in AI exports, screenshots, and re-saves).
Evidence 2	ELA mean 1.9, peak 96 (uniform high ELA can indicate generation/heavy edit).
Evidence 3	High-frequency noise std 11.51 (very low/very uniform noise is a synthesis cue).
Evidence 4	Spectral peakiness 21.99 (periodic frequency peaks can mark generated textures).

Evidence supporting this verdict

Field	Recorded detail
Claude Vision	synthetic likelihood 82/100; tells: not a camera photo: digital illustration in a uniform, polished comic/ink-and-colour style typical of current image generators, hyper-consistent line weight and cel shading across all figures with no stroke variation or construction marks, noisy, fragmented texture in the grey curly hair, resembling generator detail artifacts rather than deliberate strokes, tablet screen shows an indistinct garden/playground scene with smeared, non-specific detail
OpenAI Vision	synthetic likelihood 78/100; tells: Older woman's gray hair contains tangled, ribbon-like shapes inconsistent with the other hair rendering., Wheelchair spokes and lower frame tubes form irregular junctions and ambiguous connections., Gesturing hands have uneven finger separation and merged-looking contours., Tablet garden has noticeably softer, less defined detail than the surrounding outlined illustration.
Gemini Vision	synthetic likelihood 72/100; tells: stylized digital line art with subtle AI generative markers, irregular finger proportions and geometry, overly smooth shading gradients typical of generative models, inconsistent perspective on wheelchair spokes

Additional findings

Field	Recorded detail
Local forensic cues	Supporting observation; considered alongside the model assessments.
C2PA Content Credentials	File integrity: validated. Signer trust: unresolved under the current local policy. The recorded declarations remain available for review and are not used as a decisive provenance finding. Manifest declares AI-generated content.

How this assessment was reached

Field	Recorded detail
1. override	outcome=none; detail=No confirmed C2PA AI assertion or SynthID watermark. Origin remains unresolved by these checks.
2. model_agreement	synthetic=['Claude Vision', 'OpenAI Vision', 'Gemini Vision']; authentic=[]; uncertain=[]; forensic_supports_synthetic=False
3. verdict	value=synthetic_likely; confidence=high; reason=3 models agree this is likely synthetic.

File and analysis record

Field	Recorded detail
File	illustration-1.png
Analysis ID	b5b0ad60-55ee-4036-9903-631bccce3d5b
Generated	2026-09-26T22:31:03+00:00
Tool	SDA Vision 0.1.0
Models	claude-opus-5-5, gemini-3.8-flash, gpt-6-astra
Method version	pdf-preparation-2026-09-26.1
Analysis lens	general
Original SHA-256	137f1b7c292c882be741e1a6c881ab4a2082c7dd6ab2181d63304000a0d92252
Ingestion note 1	Fresh provider replies acquired for eleven-examples-refresh-20260926-r1; report assembled locally from the saved responses without further API calls.
Ingestion note 2	Provider latency values are restored from the acquisition receipts (maximum sampled-frame latency per provider); raw replies and assessment results are unchanged by this bookkeeping step.
