SDA Vision / Research report

illustration-2.png

Assessment summary

Field	Recorded detail
Finding	Leaning synthetic
Recorded verdict	synthetic likely
Confidence	high
Indicative rating	82/100
Rating basis	median of available model ratings; not a calibrated probability
Explanation	3 models agree this is likely synthetic.
Coverage	image - 1 frame(s) analysed
Review context	Research assessment. Review alongside source information and context. When credentials are missing, origin remains unresolved by this check. Use these findings to inform a documented human review.

Provider overview

Provider	Type / status	Assessment	Rating
Claude Vision	vision / ok	synthetic likely	88/100
OpenAI Vision	vision / ok	synthetic likely	82/100
Gemini Vision	vision / ok	synthetic likely	72/100
C2PA Content Credentials	provenance / ok	inconclusive	n/a
Local forensic cues	forensic / ok	partially synthetic	41/100

Provider evidence / 1

Field	Recorded detail
Provider	Claude Vision
Model	claude-opus-5-5
Status	ok
Assessment	synthetic likely
Confidence	medium
Role in assessment	Supporting
Provider summary	synthetic likelihood 88/100; tells: garbled secondary text on props: 'ULTRA-PATCAI' bottle label, 'Buy Chloe' / 'Buy' rendered as 'Buu' on placard, 'REMEDV' jar label, illegible pseudo-text lines on 'VACCINE FACTS' sheet and 'REMEDY' label, 'EMERGENCY' sign truncated and awkwardly occluded, uniform glossy semi-realistic comic rendering typical of diffusion image models across all faces
Evidence 1	Garbled secondary text on props: 'ULTRA-PATCAI' bottle label, 'Buy Chloe' / 'Buy' rendered as 'Buu' on placard, 'REMEDV' jar label
Evidence 2	Illegible pseudo-text lines on 'VACCINE FACTS' sheet and 'REMEDY' label
Evidence 3	'EMERGENCY' sign truncated and awkwardly occluded
Evidence 4	Uniform glossy semi-realistic comic rendering typical of diffusion image models across all faces
Evidence 5	Man with megaphone holding a bottle in a hand of ambiguous ownership near the poster, suggesting limb/hand attribution confusion
Evidence 6	Poster held by hands that merge oddly with easel and frame edges
Evidence 7	Crowd faces with repetitive idealised features and consistent AI-style shading
Evidence 8	Speech-bubble text notably cleaner than in-scene text, consistent with either improved model text rendering or post-added typography
Evidence 9	SDA logo box overlaid as a flat graphic, likely added in post
Evidence 10	Caveat: Illustrations lack camera-sensor cues, so the rating rests on stylistic and text-rendering artifacts; a human artist or hybrid workflow (AI base plus hand-added bubbles and logo) cannot be ruled out without metadata or provenance (C2PA). Verify whether 'Chloe Dubois' refers to a real person.

Provider evidence / 2

Field	Recorded detail
Provider	OpenAI Vision
Model	gpt-6-astra
Status	ok
Assessment	synthetic likely
Confidence	medium
Role in assessment	Supporting
Provider summary	synthetic likelihood 82/100; tells: Ambiguous arm ownership around the megaphone and raised bottle, Cramped, irregular finger contours around the small ULTRA-PATCH bottle, Background placard repeats 'Chloe Dubois Buy Chloe' without clear layout logic, Highly uniform glossy facial shading and repeated stylized hair highlights across the crowd
Evidence 1	Ambiguous arm ownership around the megaphone and raised bottle
Evidence 2	Cramped, irregular finger contours around the small ULTRA-PATCH bottle
Evidence 3	Background placard repeats 'Chloe Dubois Buy Chloe' without clear layout logic
Evidence 4	Highly uniform glossy facial shading and repeated stylized hair highlights across the crowd
Evidence 5	Caveat: This is an illustration, not a camera photo; stylization and polished lettering alone cannot distinguish AI generation from human artwork. Source files and provenance need review.

Provider evidence / 3

Field	Recorded detail
Provider	Gemini Vision
Model	gemini-3.8-flash
Status	ok
Assessment	synthetic likely
Confidence	medium
Role in assessment	Supporting
Provider summary	synthetic likelihood 72/100; tells: model read this as AI editing over a photographic base image, smooth vector-comic diffusion styling, slight anatomical and hand rendering anomalies, AI-typical illustrative shading on hair and faces
Evidence 1	Model read this as AI editing over a photographic base image
Evidence 2	Smooth vector-comic diffusion styling
Evidence 3	Slight anatomical and hand rendering anomalies
Evidence 4	AI-typical illustrative shading on hair and faces
Evidence 5	Typeset overlays added digitally over generated background art
Evidence 6	Caveat: Digital comic illustrations can closely resemble standard human graphic design; text bubbles appear to be manually composited overlays.

Content Credentials / provenance

Field	Recorded detail
Provider	C2PA Content Credentials
Model	Not recorded
Status	ok
Assessment	inconclusive
Confidence	Not recorded
Role in assessment	Additional finding
Provider summary	Embedded credentials: none found. Origin remains unresolved by this check.
Evidence 1	Coverage: credentials embedded in the submitted file. External credentials were not retrieved.
Evidence 2	Verifier: c2pa-python 0.37.12; native SDK 0.91.0; specification target 2.4; policy embedded-offline-reviewed-trust-v3.
Evidence 3	Offline embedded-manifest verification; no network trust-list, manifest or revocation refresh.
Evidence 4	No reviewed local C2PA trust snapshot installed. Provenance overrides are disabled.

Provider evidence / 5

Field	Recorded detail
Provider	Local forensic cues
Model	Not recorded
Status	ok
Assessment	partially synthetic
Confidence	low
Role in assessment	Additional finding
Provider summary	Heuristic synthetic likelihood 41/100 from metadata + pixel statistics.
Evidence 1	No camera EXIF (common in AI exports, screenshots, and re-saves).
Evidence 2	ELA mean 1.4, peak 24 (uniform high ELA can indicate generation/heavy edit).
Evidence 3	High-frequency noise std 14.26 (very low/very uniform noise is a synthesis cue).
Evidence 4	Spectral peakiness 13.87 (periodic frequency peaks can mark generated textures).

Evidence supporting this verdict

Field	Recorded detail
Claude Vision	synthetic likelihood 88/100; tells: garbled secondary text on props: 'ULTRA-PATCAI' bottle label, 'Buy Chloe' / 'Buy' rendered as 'Buu' on placard, 'REMEDV' jar label, illegible pseudo-text lines on 'VACCINE FACTS' sheet and 'REMEDY' label, 'EMERGENCY' sign truncated and awkwardly occluded, uniform glossy semi-realistic comic rendering typical of diffusion image models across all faces
OpenAI Vision	synthetic likelihood 82/100; tells: Ambiguous arm ownership around the megaphone and raised bottle, Cramped, irregular finger contours around the small ULTRA-PATCH bottle, Background placard repeats 'Chloe Dubois Buy Chloe' without clear layout logic, Highly uniform glossy facial shading and repeated stylized hair highlights across the crowd
Gemini Vision	synthetic likelihood 72/100; tells: model read this as AI editing over a photographic base image, smooth vector-comic diffusion styling, slight anatomical and hand rendering anomalies, AI-typical illustrative shading on hair and faces

Additional findings

Field	Recorded detail
Local forensic cues	Supporting observation; considered alongside the model assessments.
C2PA Content Credentials	Embedded credentials: none found. Origin remains unresolved by this check.

Visible text

How this assessment was reached

Field	Recorded detail
1. override	outcome=none; detail=No confirmed C2PA AI assertion or SynthID watermark. Origin remains unresolved by these checks.
2. model_agreement	synthetic=['Claude Vision', 'OpenAI Vision', 'Gemini Vision']; authentic=[]; uncertain=[]; forensic_supports_synthetic=False
3. verdict	value=synthetic_likely; confidence=high; reason=3 models agree this is likely synthetic.

File and analysis record

Field	Recorded detail
File	illustration-2.png
Analysis ID	3ae29a90-fa3a-4381-9d65-498ec1b60c4d
Generated	2026-09-26T22:31:04+00:00
Tool	SDA Vision 0.1.0
Models	claude-opus-5-5, gemini-3.8-flash, gpt-6-astra
Method version	pdf-preparation-2026-09-26.1
Analysis lens	general
Original SHA-256	6693be931db5fb33a8cacfae382bf3bc79fc23b0d9f8e967015a663688d8c8f5
Ingestion note 1	Fresh provider replies acquired for eleven-examples-refresh-20260926-r1; report assembled locally from the saved responses without further API calls.
Ingestion note 2	Provider latency values are restored from the acquisition receipts (maximum sampled-frame latency per provider); raw replies and assessment results are unchanged by this bookkeeping step.
