SDA Vision / Research report

presentation.pptx

Assessment summary

Field	Recorded detail
Finding	Inconclusive
Recorded verdict	inconclusive
Confidence	low
Indicative rating	27/100
Rating basis	rounded mean of available frame scores; not a calibrated probability
Explanation	The sampled frames leave the assessment inconclusive. Review the frame results and source context.
Coverage	pptx - 4 frame(s) analysed of 14 found
Review context	Research assessment. Review alongside source information and context. When credentials are missing, origin remains unresolved by this check. Use these findings to inform a documented human review.

Provider overview

Provider	Type / status	Assessment	Rating
Claude Vision	vision / ok	synthetic likely	60/100
OpenAI Vision	vision / ok	inconclusive	20/100
Gemini Vision	vision / ok	authentic likely	28/100
C2PA Content Credentials	provenance / ok	inconclusive	n/a
Local forensic cues	forensic / ok	partially synthetic	41/100

Provider evidence / 1

Field	Recorded detail
Provider	Claude Vision
Model	claude-opus-5-5
Status	ok
Assessment	synthetic likely
Confidence	low
Role in assessment	Additional finding
Provider summary	Worst of 4 frames (slide 1): synthetic likelihood 60/100; tells: network diagram is decorative and roughly symmetric rather than a data-driven force-directed layout, inconsistent node sizes and some edges ending without clear nodes, semi-transparent, softly blurred overlapping edge layers with painterly anti-aliasing, smooth teal-to-orange color gradient across the graph unrelated to any legend
Evidence 1	Frame slide 1: 60/100
Evidence 2	Frame slide 5: 55/100
Evidence 3	Frame slide 10: 58/100
Evidence 4	Frame slide 14: 40/100
Evidence 5	Network diagram is decorative and roughly symmetric rather than a data-driven force-directed layout
Evidence 6	Inconsistent node sizes and some edges ending without clear nodes
Evidence 7	Semi-transparent, softly blurred overlapping edge layers with painterly anti-aliasing
Evidence 8	Smooth teal-to-orange color gradient across the graph unrelated to any legend
Evidence 9	Faint low-poly mesh background typical of generated slide art
Evidence 10	Text is crisply and correctly rendered, consistent with either a design tool or a modern text-capable generator
Evidence 11	No camera-origin signals (vector-style graphic, no sensor noise or lens characteristics)
Evidence 12	Caveat: This is a graphic, not a photo, so camera-authenticity cues do not apply. The slide could equally come from ordinary slide or data-visualization software (the filename suggests a PowerPoint export). Checking the source file, the author and the claimed study would resolve its origin better than visual inspection.

Provider evidence / 2

Field	Recorded detail
Provider	OpenAI Vision
Model	gpt-6-astra
Status	ok
Assessment	inconclusive
Confidence	low
Role in assessment	Additional finding
Provider summary	Worst of 4 frames (slide 5): synthetic likelihood 20/100; tells: Consistently legible text with coherent letterforms and regular spacing, Four circular nodes with uniform glow effects and thin connecting lines, Aligned text blocks and repeated geometric network decorations typical of presentation graphics, No photographic subjects or camera texture available for assessment
Evidence 1	Frame slide 1: 15/100
Evidence 2	Frame slide 5: 20/100
Evidence 3	Frame slide 10: 15/100
Evidence 4	Frame slide 14: 15/100
Evidence 5	Consistently legible text with coherent letterforms and regular spacing
Evidence 6	Four circular nodes with uniform glow effects and thin connecting lines
Evidence 7	Aligned text blocks and repeated geometric network decorations typical of presentation graphics
Evidence 8	No photographic subjects or camera texture available for assessment
Evidence 9	Caveat: This is a presentation graphic, not a camera photo; appearance alone cannot distinguish conventional slide design from AI-assisted production.

Provider evidence / 3

Field	Recorded detail
Provider	Gemini Vision
Model	gemini-3.8-flash
Status	ok
Assessment	authentic likely
Confidence	medium
Role in assessment	Additional finding
Provider summary	Worst of 4 frames (slide 1): synthetic likelihood 28/100; tells: clean vector geometry, standard digital typography, consistent presentation graphic layout, absence of generative diffusion artifacts
Evidence 1	Frame slide 1: 28/100
Evidence 2	Frame slide 5: 28/100
Evidence 3	Frame slide 10: 25/100
Evidence 4	Frame slide 14: 28/100
Evidence 5	Clean vector geometry
Evidence 6	Standard digital typography
Evidence 7	Consistent presentation graphic layout
Evidence 8	Absence of generative diffusion artifacts
Evidence 9	Caveat: Digital vector graphics and layout elements can mimic procedural generation tools.

Content Credentials / provenance

Field	Recorded detail
Provider	C2PA Content Credentials
Model	Not recorded
Status	ok
Assessment	inconclusive
Confidence	Not recorded
Role in assessment	Additional finding
Provider summary	Embedded credentials: none found. Origin remains unresolved by this check.
Evidence 1	Coverage: credentials embedded in the submitted file. External credentials were not retrieved.
Evidence 2	Verifier: c2pa-python 0.37.12; native SDK 0.91.0; specification target 2.4; policy embedded-offline-reviewed-trust-v3.
Evidence 3	Offline embedded-manifest verification; no network trust-list, manifest or revocation refresh.
Evidence 4	No reviewed local C2PA trust snapshot installed. Provenance overrides are disabled.

Provider evidence / 5

Field	Recorded detail
Provider	Local forensic cues
Model	Not recorded
Status	ok
Assessment	partially synthetic
Confidence	low
Role in assessment	Additional finding
Provider summary	Worst of 4 frames (slide 1): Heuristic synthetic likelihood 41/100 from metadata + pixel statistics.
Evidence 1	Frame slide 1: 41/100
Evidence 2	Frame slide 5: 41/100
Evidence 3	Frame slide 10: 41/100
Evidence 4	Frame slide 14: 41/100
Evidence 5	No camera EXIF (common in AI exports, screenshots, and re-saves).
Evidence 6	ELA mean 1.1, peak 24 (uniform high ELA can indicate generation/heavy edit).
Evidence 7	High-frequency noise std 15.93 (very low/very uniform noise is a synthesis cue).
Evidence 8	Spectral peakiness 11.91 (periodic frequency peaks can mark generated textures).

Per-frame results

Frame	Assessment	Rating / 100
slide 1	inconclusive	28
slide 5	inconclusive	28
slide 10	inconclusive	25
slide 14	inconclusive	28

Evidence supporting this verdict

Field	Recorded detail
Record	No entries recorded.

Additional findings

Field	Recorded detail
Claude Vision	Worst of 4 frames (slide 1): synthetic likelihood 60/100; tells: network diagram is decorative and roughly symmetric rather than a data-driven force-directed layout, inconsistent node sizes and some edges ending without clear nodes, semi-transparent, softly blurred overlapping edge layers with painterly anti-aliasing, smooth teal-to-orange color gradient across the graph unrelated to any legend
OpenAI Vision	Worst of 4 frames (slide 5): synthetic likelihood 20/100; tells: Consistently legible text with coherent letterforms and regular spacing, Four circular nodes with uniform glow effects and thin connecting lines, Aligned text blocks and repeated geometric network decorations typical of presentation graphics, No photographic subjects or camera texture available for assessment
Gemini Vision	Worst of 4 frames (slide 1): synthetic likelihood 28/100; tells: clean vector geometry, standard digital typography, consistent presentation graphic layout, absence of generative diffusion artifacts
Local forensic cues	Supporting observation; considered alongside the model assessments.
C2PA Content Credentials	Embedded credentials: none found. Origin remains unresolved by this check.

Extracted text

Field	Recorded detail
Recorded text	Catalyst 2: The Conspiracy Ecosystem | 1 The Threat Hoax: Minimising the virus itself. “It’s just the flu,” preferring natural immunity over interventions. | #Plandemic | #Scamdemic | 2 The Control Mechanism: Belief that mandates test public compliance, equating health rules to authoritarian mouth-gags. | #COVID1984 | #MaskTyranny | 3 The Micro-Constituent Fear: Targeting vaccines specifically: fears of mRNA DNA-alteration, microchips, infertility, and Bill Gates narratives. | Once a citizen accepted the ‘Control Mechanism’ premise for masks, transitioning to the ‘Micro-Constituent Fear’ for vaccines required almost no psychological leap.

How this assessment was reached

Field	Recorded detail
1. frame_agreement	frames=4; synthetic_frames=0; authentic_frames=0; rating_spread=3
2. verdict	value=inconclusive; confidence=low; reason=The sampled frames leave the assessment inconclusive. Review the frame results and source context.

File and analysis record

Field	Recorded detail
File	presentation.pptx
Analysis ID	250bad8f-c5c8-49fb-8c8c-10a2b68368b0
Generated	2026-09-26T22:31:28+00:00
Tool	SDA Vision 0.1.0
Models	claude-opus-5-5, gemini-3.8-flash, gpt-6-astra
Method version	pdf-preparation-2026-09-26.1
Analysis lens	general
Original SHA-256	d0ec89da564078611922195fca82364f2f8e63d253d02a6d9bb672a8265c5f15
Ingestion note 1	14 slides; sampled 4 of 14 embedded slide image(s).
Ingestion note 2	Fresh provider replies acquired for eleven-examples-refresh-20260926-r1; report assembled locally from the saved responses without further API calls.
Ingestion note 3	Provider latency values are restored from the acquisition receipts (maximum sampled-frame latency per provider); raw replies and assessment results are unchanged by this bookkeeping step.
