SDA Vision / Research report

social-media-image.png

Assessment summary

Field	Recorded detail
Finding	Leaning synthetic
Recorded verdict	synthetic likely
Confidence	high
Indicative rating	93/100
Rating basis	median of available model ratings; not a calibrated probability
Explanation	3 models agree this is likely synthetic.
Coverage	image - 1 frame(s) analysed
Review context	Research assessment. Review alongside source information and context. When credentials are missing, origin remains unresolved by this check. Use these findings to inform a documented human review.

Provider overview

Provider	Type / status	Assessment	Rating
Claude Vision	vision / ok	synthetic likely	93/100
OpenAI Vision	vision / ok	synthetic likely	94/100
Gemini Vision	vision / ok	synthetic likely	82/100
C2PA Content Credentials	provenance / ok	inconclusive	n/a
Local forensic cues	forensic / ok	partially synthetic	41/100

Provider evidence / 1

Field	Recorded detail
Provider	Claude Vision
Model	claude-opus-5-5
Status	ok
Assessment	synthetic likely
Confidence	high
Role in assessment	Supporting
Provider summary	synthetic likelihood 93/100; tells: hyper-saturated cinematic orange/teal grading typical of image generators, over-sharpened, uniformly detailed rabbit fur and whiskers with glowing rim light, implausible scale and composition: intact rabbit resting directly on a mass of glossy visceral tissue, organ mass has generic, anatomically incoherent structure with plastic-like specular highlights
Evidence 1	Hyper-saturated cinematic orange/teal grading typical of image generators
Evidence 2	Over-sharpened, uniformly detailed rabbit fur and whiskers with glowing rim light
Evidence 3	Implausible scale and composition: intact rabbit resting directly on a mass of glossy visceral tissue
Evidence 4	Organ mass has generic, anatomically incoherent structure with plastic-like specular highlights
Evidence 5	Stylised glowing drop at needle tip and spark/glow effects without physical light source
Evidence 6	Syringe barrel markings indistinct and non-legible
Evidence 7	Uniform bokeh of lab glassware lacking real optical detail
Evidence 8	Small four-point sparkle watermark in bottom-right corner consistent with an AI-generation provenance mark
Evidence 9	No camera grain, noise or lens imperfections; overall clean render look
Evidence 10	Caveat: The text overlay is a graphic addition, so the base image's origin is judged only from visual style and the corner sparkle mark. Verify the mark and any embedded metadata or C2PA/SynthID signals before drawing conclusions.

Provider evidence / 2

Field	Recorded detail
Provider	OpenAI Vision
Model	gpt-6-astra
Status	ok
Assessment	synthetic likely
Confidence	high
Role in assessment	Supporting
Provider summary	synthetic likelihood 94/100; tells: Syringe has unusually elaborate stacked connector rings and inconsistent graduation marks., Foreground organs and vessels merge into convoluted, highly glossy forms without clear anatomical boundaries., Rabbit fur and whiskers have unusually uniform sharpness and strong orange rim lighting., Liquid, tissue, and syringe share exaggerated jewel-like highlights.
Evidence 1	Syringe has unusually elaborate stacked connector rings and inconsistent graduation marks.
Evidence 2	Foreground organs and vessels merge into convoluted, highly glossy forms without clear anatomical boundaries.
Evidence 3	Rabbit fur and whiskers have unusually uniform sharpness and strong orange rim lighting.
Evidence 4	Liquid, tissue, and syringe share exaggerated jewel-like highlights.
Evidence 5	Small four-point sparkle emblem appears at the lower right.
Evidence 6	Caveat: Stylized CGI or a heavily retouched composite could produce similar cues; the image alone cannot establish AI provenance.

Provider evidence / 3

Field	Recorded detail
Provider	Gemini Vision
Model	gemini-3.8-flash
Status	ok
Assessment	synthetic likely
Confidence	high
Role in assessment	Supporting
Provider summary	synthetic likelihood 82/100; tells: hyper-rendered specular textures on viscera, unnatural fusion of biological anatomical forms, stylized digital lighting and bokeh inconsistencies, AI-typical crisp fur detailing with odd spatial occlusion
Evidence 1	Hyper-rendered specular textures on viscera
Evidence 2	Unnatural fusion of biological anatomical forms
Evidence 3	Stylized digital lighting and bokeh inconsistencies
Evidence 4	AI-typical crisp fur detailing with odd spatial occlusion
Evidence 5	Caveat: High-end 3D CGI or professional digital compositing can mimic generative-AI artifacts.

Content Credentials / provenance

Field	Recorded detail
Provider	C2PA Content Credentials
Model	Not recorded
Status	ok
Assessment	inconclusive
Confidence	Not recorded
Role in assessment	Additional finding
Provider summary	Embedded credentials: none found. Origin remains unresolved by this check.
Evidence 1	Coverage: credentials embedded in the submitted file. External credentials were not retrieved.
Evidence 2	Verifier: c2pa-python 0.37.12; native SDK 0.91.0; specification target 2.4; policy embedded-offline-reviewed-trust-v3.
Evidence 3	Offline embedded-manifest verification; no network trust-list, manifest or revocation refresh.
Evidence 4	No reviewed local C2PA trust snapshot installed. Provenance overrides are disabled.

Provider evidence / 5

Field	Recorded detail
Provider	Local forensic cues
Model	Not recorded
Status	ok
Assessment	partially synthetic
Confidence	low
Role in assessment	Additional finding
Provider summary	Heuristic synthetic likelihood 41/100 from metadata + pixel statistics.
Evidence 1	No camera EXIF (common in AI exports, screenshots, and re-saves).
Evidence 2	ELA mean 2.3, peak 74 (uniform high ELA can indicate generation/heavy edit).
Evidence 3	High-frequency noise std 7.53 (very low/very uniform noise is a synthesis cue).
Evidence 4	Spectral peakiness 22.81 (periodic frequency peaks can mark generated textures).

Evidence supporting this verdict

Field	Recorded detail
Claude Vision	synthetic likelihood 93/100; tells: hyper-saturated cinematic orange/teal grading typical of image generators, over-sharpened, uniformly detailed rabbit fur and whiskers with glowing rim light, implausible scale and composition: intact rabbit resting directly on a mass of glossy visceral tissue, organ mass has generic, anatomically incoherent structure with plastic-like specular highlights
OpenAI Vision	synthetic likelihood 94/100; tells: Syringe has unusually elaborate stacked connector rings and inconsistent graduation marks., Foreground organs and vessels merge into convoluted, highly glossy forms without clear anatomical boundaries., Rabbit fur and whiskers have unusually uniform sharpness and strong orange rim lighting., Liquid, tissue, and syringe share exaggerated jewel-like highlights.
Gemini Vision	synthetic likelihood 82/100; tells: hyper-rendered specular textures on viscera, unnatural fusion of biological anatomical forms, stylized digital lighting and bokeh inconsistencies, AI-typical crisp fur detailing with odd spatial occlusion

Additional findings

Field	Recorded detail
Local forensic cues	Supporting observation; considered alongside the model assessments.
C2PA Content Credentials	Embedded credentials: none found. Origin remains unresolved by this check.

How this assessment was reached

Field	Recorded detail
1. override	outcome=none; detail=No confirmed C2PA AI assertion or SynthID watermark. Origin remains unresolved by these checks.
2. model_agreement	synthetic=['Claude Vision', 'OpenAI Vision', 'Gemini Vision']; authentic=[]; uncertain=[]; forensic_supports_synthetic=False
3. verdict	value=synthetic_likely; confidence=high; reason=3 models agree this is likely synthetic.

File and analysis record

Field	Recorded detail
File	social-media-image.png
Analysis ID	19e08bec-290f-4eef-bc04-a35798496852
Generated	2026-09-26T22:31:29+00:00
Tool	SDA Vision 0.1.0

Method version	pdf-preparation-2026-09-26.1
Analysis lens	general
Original SHA-256	f849e223762889e4d091fdf09caae3de19bff4cdc6e0024b50379276318f9fe7
Ingestion note 1	Fresh provider replies acquired for eleven-examples-refresh-20260926-r1; report assembled locally from the saved responses without further API calls.
Ingestion note 2	Provider latency values are restored from the acquisition receipts (maximum sampled-frame latency per provider); raw replies and assessment results are unchanged by this bookkeeping step.
