

SDA Vision / Research report

illustration-1.png

Assessment summary

Field	Recorded detail
Finding	Leaning synthetic
Recorded verdict	synthetic likely
Confidence	high
Indicative rating	78/100
Rating basis	median of available model ratings; not a calibrated probability
Explanation	3 models agree this is likely synthetic.
Coverage	image - 1 frame(s) analysed
Review context	Research assessment. Review alongside source information and context. When credentials are missing, origin remains unresolved by this check. Use these findings to inform a documented human review.

Provider overview

Provider	Type / status	Assessment	Rating
Claude Vision	vision / ok	synthetic likely	85/100
OpenAI Vision	vision / ok	synthetic likely	78/100
Gemini Vision	vision / ok	synthetic likely	72/100
C2PA Content Credentials	provenance / ok	inconclusive	n/a
Local forensic cues	forensic / ok	partially synthetic	41/100

Provider evidence / 1

Field	Recorded detail
Provider	Claude Vision
Model	claude-opus-5-5
Status	ok
Assessment	synthetic likely
Confidence	medium
Role in assessment	Supporting
Provider summary	synthetic likelihood 85/100; tells: uniform digital-illustration style with inked outlines and painterly shading typical of current image generators, over-regular stippled texture in grey curly hair, wheelchair spoke and frame geometry inconsistent between wheels, with spokes merging and fading, tablet screen shows a generic, softly detailed garden scene with no UI elements
Evidence 1	Uniform digital-illustration style with inked outlines and painterly shading typical of current image generators
Evidence 2	Over-regular stippled texture in grey curly hair
Evidence 3	Wheelchair spoke and frame geometry inconsistent between wheels, with spokes merging and fading
Evidence 4	Tablet screen shows a generic, softly detailed garden scene with no UI elements
Evidence 5	Hands plausible but slightly smoothed, with simplified finger joints
Evidence 6	Wheelchair and basketball rendered at high detail while the table base is very simple
Evidence 7	Clean white background with slight halo/edge fringing around figures
Evidence 8	No camera signals (not a photograph), so lens/noise analysis not applicable
Evidence 9	Caveat: This is an illustration, not a photo, so the rating reflects stylistic generator tells versus human digital artwork. Skilled human illustrators can produce similar results, so provenance metadata or the source should be checked.

Provider evidence / 2

Field	Recorded detail
Provider	OpenAI Vision
Model	gpt-6-astra
Status	ok
Assessment	synthetic likely
Confidence	medium
Role in assessment	Supporting
Provider summary	synthetic likelihood 78/100; tells: Gray hair contains tangled, ribbon-like shapes inconsistent with the other hair rendering., Wheelchair spokes and frame supports intersect in mechanically ambiguous ways., Gesturing hands have uneven finger separation and awkward contours., Illustrated outlines and smooth shading throughout; no photographic base is evident.
Evidence 1	Gray hair contains tangled, ribbon-like shapes inconsistent with the other hair rendering.
Evidence 2	Wheelchair spokes and frame supports intersect in mechanically ambiguous ways.
Evidence 3	Gesturing hands have uneven finger separation and awkward contours.
Evidence 4	Illustrated outlines and smooth shading throughout; no photographic base is evident.
Evidence 5	Caveat: This is a stylized illustration; human-drawn or stock artwork can share these irregularities, so source provenance should be checked.

Provider evidence / 3

Field	Recorded detail
Provider	Gemini Vision
Model	gemini-3.8-flash
Status	ok
Assessment	synthetic likely
Confidence	medium
Role in assessment	Supporting
Provider summary	synthetic likelihood 72/100; tells: digital illustration style with hyper-clean lines, typical diffusion model character rendering features, slight anatomical inconsistencies in hands and fingers, unusual blending around tablet screen integration
Evidence 1	Digital illustration style with hyper-clean lines
Evidence 2	Typical diffusion model character rendering features
Evidence 3	Slight anatomical inconsistencies in hands and fingers
Evidence 4	Unusual blending around tablet screen integration
Evidence 5	Caveat: Vector or digital human art can closely mimic generative cartoon styles.

Content Credentials / provenance

Field	Recorded detail
Provider	C2PA Content Credentials
Model	Not recorded
Status	ok
Assessment	inconclusive
Confidence	Not recorded
Role in assessment	Additional finding
Provider summary	File integrity: validated. Signer trust: unresolved under the current local policy. The recorded declarations remain available for review and are not used as a decisive provenance finding. Manifest declares AI-generated content.
Evidence 1	Credentials: embedded manifest found.
Evidence 2	Integrity: valid (SDK validation).
Evidence 3	Signer trust: untrusted under the configured verifier.
Evidence 4	Active manifest: Manifest declares AI-generated content.
Evidence 5	Claim generator (declared tool): OpenAI Media Service API
Evidence 6	Declared signer: OpenAI OpCo, LLC
Evidence 7	Declared source type: http://cv.iptc.org/newscodes/digitalsourcetype/trainedalgorithmicmedia
Evidence 8	Active record - declared tool: OpenAI Media Service API; actions: c2pa.created, c2pa.converted, c2pa.watermarked.unbound.
Evidence 9	Active record - all actions recorded (signer's declaration): no.
Evidence 10	Validation outcome: signingCredential.untrusted
Evidence 11	Validation outcome: timeStamp.validated
Evidence 12	Validation outcome: claimSignature.insideValidity
Evidence 13	Validation outcome: claimSignature.validated
Evidence 14	Validation outcome: assertion.hashedURI.match
Evidence 15	Validation outcome: assertion.dataHash.match
Evidence 16	Validation outcome: timeStamp.untrusted

Field	Recorded detail
Evidence 17	Verifier: c2pa-python 0.37.12; native SDK 0.91.0; specification target 2.4; policy embedded-offline-reviewed-trust-v3.
Evidence 18	Offline embedded-manifest verification; no network trust-list, manifest or revocation refresh.
Evidence 19	No reviewed local C2PA trust snapshot installed. Provenance overrides are disabled.

Provider evidence / 5

Field	Recorded detail
Provider	Local forensic cues
Model	Not recorded
Status	ok
Assessment	partially synthetic
Confidence	low
Role in assessment	Additional finding
Provider summary	Heuristic synthetic likelihood 41/100 from metadata + pixel statistics.
Evidence 1	No camera EXIF (common in AI exports, screenshots, and re-saves).
Evidence 2	ELA mean 1.9, peak 96 (uniform high ELA can indicate generation/heavy edit).
Evidence 3	High-frequency noise std 11.51 (very low/very uniform noise is a synthesis cue).
Evidence 4	Spectral peakiness 21.99 (periodic frequency peaks can mark generated textures).

Evidence supporting this verdict

Field	Recorded detail
Claude Vision	synthetic likelihood 85/100; tells: uniform digital-illustration style with inked outlines and painterly shading typical of current image generators, over-regular stippled texture in grey curly hair, wheelchair spoke and frame geometry inconsistent between wheels, with spokes merging and fading, tablet screen shows a generic, softly detailed garden scene with no UI elements
OpenAI Vision	synthetic likelihood 78/100; tells: Gray hair contains tangled, ribbon-like shapes inconsistent with the other hair rendering., Wheelchair spokes and frame supports intersect in mechanically ambiguous ways., Gesturing hands have uneven finger separation and awkward contours., Illustrated outlines and smooth shading throughout; no photographic base is evident.
Gemini Vision	synthetic likelihood 72/100; tells: digital illustration style with hyper-clean lines, typical diffusion model character rendering features, slight anatomical inconsistencies in hands and fingers, unusual blending around tablet screen integration

Additional findings

Field	Recorded detail
Local forensic cues	Supporting observation; considered alongside the model assessments.
C2PA Content Credentials	File integrity: validated. Signer trust: unresolved under the current local policy. The recorded declarations remain available for review and are not used as a decisive provenance finding. Manifest declares AI-generated content.

How this assessment was reached

Field	Recorded detail
1. override	outcome=none; detail=No confirmed C2PA AI assertion or SynthID watermark. Origin remains unresolved by these checks.
2. model_agreement	synthetic=['Claude Vision', 'OpenAI Vision', 'Gemini Vision']; authentic=[]; uncertain=[]; forensic_supports_synthetic=False
3. verdict	value=synthetic_likely; confidence=high; reason=3 models agree this is likely synthetic.

File and analysis record

Field	Recorded detail
File	illustration-1.png
Analysis ID	e2d54768-0627-4b09-8e9c-bab7b58c211f
Generated	2026-09-26T17:54:47+00:00
Tool	SDA Vision 0.1.0
Models	claude-opus-5-5, gemini-3.8-flash, gpt-6-astra
Method version	verdict-consistency-2026-09-26.1
Analysis lens	general
Original SHA-256	137f1b7c292c882be741e1a6c881ab4a2082c7dd6ab2181d63304000a0d92252
Ingestion note 1	Recomputed locally from the same saved provider replies acquired under run five-examples-20260926-r1. No new provider requests. Original report 6ed01bd6-3868-4680-ba90-536492d5c7ff was generated at 2026-09-26T17:38:40+00:00 under method publication-repair-2026-09-24.3; that report is preserved.
Ingestion note 2	Method verdict-consistency-2026-09-26.1: directional model votes require matching explicit verdicts and rating thresholds. Inconclusive replies retain their ratings and remain undecided observations.
Ingestion note 3	Presentation copy of saved report 6faeca61-589d-4810-8b3a-aec00dfb18e5. The descriptive filename replaces the earlier example ID for navigation. Original analysis dates, provider replies, scores and acquisition context are retained; no new model analysis.
