

SDA Vision / Research report

presentation.pptx

Assessment summary

Field	Recorded detail
Finding	Inconclusive
Recorded verdict	inconclusive
Confidence	low
Indicative rating	26/100
Rating basis	rounded mean of available frame scores; not a calibrated probability
Explanation	The sampled frames leave the assessment inconclusive. Review the frame results and source context.
Coverage	pptx - 4 frame(s) analysed of 14 found
Review context	Research assessment. Review alongside source information and context. When credentials are missing, origin remains unresolved by this check. Use these findings to inform a documented human review.

Provider overview

Provider	Type / status	Assessment	Rating
Claude Vision	vision / ok	inconclusive	58/100
OpenAI Vision	vision / ok	inconclusive	15/100
Gemini Vision	vision / ok	authentic likely	28/100
C2PA Content Credentials	provenance / ok	inconclusive	n/a
Local forensic cues	forensic / ok	partially synthetic	41/100

Provider evidence / 1

Field	Recorded detail
Provider	Claude Vision
Model	claude-opus-5-5
Status	ok
Assessment	inconclusive
Confidence	low
Role in assessment	Additional finding
Provider summary	Worst of 4 frames (slide 1): synthetic likelihood 58/100; tells: network diagram geometry is approximately but not mathematically regular: uneven node spacing and edge endpoints that do not always terminate cleanly on nodes, some edges appear semi-transparent or softly blurred in an inconsistent way, unlike typical crisp vector rendering, teal-to-orange colour transition across nodes is painterly rather than rule-based, faint background polygon mesh with irregular, fading line segments
Evidence 1	Frame slide 1: 58/100
Evidence 2	Frame slide 5: 58/100
Evidence 3	Frame slide 10: 55/100
Evidence 4	Frame slide 14: 55/100
Evidence 5	Network diagram geometry is approximately but not mathematically regular: uneven node spacing and edge endpoints that do not always terminate cleanly on nodes
Evidence 6	Some edges appear semi-transparent or softly blurred in an inconsistent way, unlike typical crisp vector rendering
Evidence 7	Teal-to-orange colour transition across nodes is painterly rather than rule-based
Evidence 8	Faint background polygon mesh with irregular, fading line segments
Evidence 9	Typography is clean, correctly spelled and consistently kerned, which fits either conventional slide software or a modern text-capable image generator
Evidence 10	No camera signals (no sensor noise, lens blur or perspective) because this is a flat digital graphic, so photographic forensics do not apply
Evidence 11	Filename indicates a PowerPoint slide export, a plausible conventional design origin
Field	Recorded detail
Evidence 12	Caveat: This is a flat designed graphic, so camera-based forensic cues are absent. The irregular network rendering suggests an AI image generator but could also

Field	Recorded detail
	come from design or graph-visualisation software. Checking the source .pptx file, its metadata and the authoring tool history would be more decisive than visual inspection.

Provider evidence / 2

Field	Recorded detail
Provider	OpenAI Vision
Model	gpt-6-astra
Status	ok
Assessment	inconclusive
Confidence	medium
Role in assessment	Additional finding
Provider summary	Worst of 4 frames (slide 1): synthetic likelihood 15/100; tells: Presentation-slide layout rather than a camera photograph, Legible typography with consistent letterforms and alignment, Network illustration uses clean straight edges and regularly placed circular nodes, No obvious generative distortions; conventional vector graphics could explain the design
Evidence 1	Frame slide 1: 15/100
Evidence 2	Frame slide 5: 15/100
Evidence 3	Frame slide 10: 12/100
Evidence 4	Frame slide 14: 10/100
Evidence 5	Presentation-slide layout rather than a camera photograph
Evidence 6	Legible typography with consistent letterforms and alignment
Evidence 7	Network illustration uses clean straight edges and regularly placed circular nodes
Evidence 8	No obvious generative distortions; conventional vector graphics could explain the design
Evidence 9	Caveat: A digitally designed slide is not itself evidence of AI generation; source files or provenance records are needed to distinguish conventional design from AI assistance.

Provider evidence / 3

Field	Recorded detail
Provider	Gemini Vision
Model	gemini-3.8-flash
Status	ok
Assessment	authentic likely
Confidence	medium
Role in assessment	Additional finding
Provider summary	Worst of 4 frames (slide 5): synthetic likelihood 28/100; tells: sharp vector-style typography, clean standard digital design elements, absence of generative diffusion artifacts, structured geometric layout
Evidence 1	Frame slide 1: 25/100
Evidence 2	Frame slide 5: 28/100
Evidence 3	Frame slide 10: 25/100
Evidence 4	Frame slide 14: 25/100
Evidence 5	Sharp vector-style typography
Evidence 6	Clean standard digital design elements
Evidence 7	Absence of generative diffusion artifacts
Evidence 8	Structured geometric layout
Evidence 9	Caveat: Standard presentation slide graphics can be synthesized or edited via modern automated design tools.

Content Credentials / provenance

Field	Recorded detail
Provider	C2PA Content Credentials
Model	Not recorded
Status	ok
Assessment	inconclusive
Confidence	Not recorded
Role in assessment	Additional finding
Provider summary	Embedded credentials: none found. Origin remains unresolved by this check.
Evidence 1	Coverage: credentials embedded in the submitted file. External credentials were not retrieved.
Evidence 2	Verifier: c2pa-python 0.37.12; native SDK 0.91.0; specification target 2.4; policy embedded-offline-reviewed-trust-v3.
Evidence 3	Offline embedded-manifest verification; no network trust-list, manifest or revocation refresh.
Evidence 4	No reviewed local C2PA trust snapshot installed. Provenance overrides are disabled.

Provider evidence / 5

Field	Recorded detail
Provider	Local forensic cues
Model	Not recorded
Status	ok
Assessment	partially synthetic
Confidence	low
Role in assessment	Additional finding
Provider summary	Worst of 4 frames (slide 1): Heuristic synthetic likelihood 41/100 from metadata + pixel statistics.
Evidence 1	Frame slide 1: 41/100
Evidence 2	Frame slide 5: 41/100
Evidence 3	Frame slide 10: 41/100
Evidence 4	Frame slide 14: 41/100
Evidence 5	No camera EXIF (common in AI exports, screenshots, and re-saves).
Evidence 6	ELA mean 1.1, peak 24 (uniform high ELA can indicate generation/heavy edit).
Evidence 7	High-frequency noise std 15.93 (very low/very uniform noise is a synthesis cue).
Evidence 8	Spectral peakiness 11.91 (periodic frequency peaks can mark generated textures).

Per-frame results

Frame	Assessment	Rating / 100
slide 1	inconclusive	25
slide 5	inconclusive	28
slide 10	authentic likely	25
slide 14	inconclusive	25

Evidence supporting this verdict

Field	Recorded detail
Record	No entries recorded.

Additional findings

Field	Recorded detail
Claude Vision	Worst of 4 frames (slide 1): synthetic likelihood 58/100; tells: network diagram geometry is approximately but not mathematically regular: uneven node spacing and edge endpoints that do not always terminate cleanly on nodes, some edges appear semi-transparent or softly blurred in an inconsistent way, unlike typical crisp vector rendering, teal-to-orange colour transition across nodes is painterly rather than rule-based, faint background polygon mesh with irregular, fading line segments
OpenAI Vision	Worst of 4 frames (slide 1): synthetic likelihood 15/100; tells: Presentation-slide layout rather than a camera photograph, Legible typography with consistent letterforms and alignment, Network illustration uses clean straight edges and regularly placed circular nodes, No obvious generative distortions; conventional vector graphics could explain the design
Gemini Vision	Worst of 4 frames (slide 5): synthetic likelihood 28/100; tells: sharp vector-style typography, clean standard digital design elements, absence of generative diffusion artifacts, structured geometric layout
Local forensic cues	Supporting observation; considered alongside the model assessments.
C2PA Content Credentials	Embedded credentials: none found. Origin remains unresolved by this check.

Extracted text

Field	Recorded detail
Recorded text	Catalyst 2: The Conspiracy Ecosystem 1 #Plandemic The Threat Hoax Minimising the virus itself. "It's just the flu," preferring natural immunity over interventions. #Scamdemic 2 #COVID1984 The Control Mechanism Belief that mandates test public compliance, equating health rules to authoritarian mouth-gags. #MaskTyranny 3 The Micro-Constituent Fear Targeting vaccines specifically: fears of mRNA DNA-alteration, microchips, infertility, and Bill Gates narratives. Once a citizen accepted the 'Control Mechanism' premise for masks, transitioning to the 'Micro-Constituent Fear' for vaccines required almost no psychological leap.

How this assessment was reached

Field	Recorded detail
1. frame_agreement	frames=4; synthetic_frames=0; authentic_frames=1; rating_spread=3
2. verdict	value=inconclusive; confidence=low; reason=The sampled frames leave the assessment inconclusive. Review the frame results and source context.

File and analysis record

Field	Recorded detail
File	presentation.pptx
Analysis ID	07b8225b-30ca-47ee-8808-13e21f17ca4b
Generated	2026-09-26T17:54:46+00:00
Tool	SDA Vision 0.1.0
Models	claude-opus-5-5, gemini-3.8-flash, gpt-6-astra
Method version	verdict-consistency-2026-09-26.1
Analysis lens	general
Original SHA-256	d0ec89da564078611922195fca82364f2f8e63d253d02a6d9bb672a8265c5f15
Ingestion note 1	14 slides; sampled 4 of 14 embedded slide image(s).
Ingestion note 2	Recomputed locally from the same saved provider replies acquired under run five-examples-20260926-r1. No new provider requests. Original report f08956d6-23e1-4043-972d-6af6e3cd2603 was generated at 2026-09-26T17:38:39+00:00 under method publication-repair-2026-09-24.3; that report is preserved.
Ingestion note 3	Method verdict-consistency-2026-09-26.1: directional model votes require matching explicit verdicts and rating thresholds. Inconclusive replies retain their ratings and remain undecided observations.
Ingestion note 4	Presentation copy of saved report d5854304-5dab-4b76-945b-d844e5fe7c44. The descriptive filename replaces the earlier example ID for navigation. Original analysis dates, provider replies, scores and acquisition context are retained; no new model analysis.
